

PALLET DISPENSER

Technical Data Sheet

GENERAL DESCRIPTION (model #7248 shown with optional infeed conveyor)

MESH Automation's Pallet Dispenser is a pre-engineered platform designed for flexibility and rugged performance. The unique MESH designed stack lift system functions better on poor quality or highly variable pallets than typical cam systems, allowing for less jams and reduced operator attention. The rugged welded steel construction and off the shelf componentry is ideal for those factories that demand high performance and uptime.

BENEFITS

- High Productivity
- Safety Guarding Included
- Built for 24/7 operation
- Low Maintenance
- 24/7 Service Available
- High Capacity Magazine
- Readily Available Spare Parts
- Flexible Pallet Formats

PERFORMANCE SPECIFICATIONS

Models	4848A	7248A	4840F	
Pallet size Max	48" W x 48" L	72" W x 48" L	48" W x 40" L	
Pallet size Min	36" W x 30" L	47" W x 30" L	48" W x 40" L	
Optional infeed conveyor	Available	Available	Available	
Standard PLC control	Rockwell or Siemens	Rockwell or Siemens	Rockwell or Siemens	
Outfeed conveyor height	Elevation equals 16" standard, Other elevations available			
Conveyor speed	60 fpm, other speeds available			
Safety	Meets control standard EN ISO12100 and 12389-1			
Stack Height Max	12 pallets, each 5.5" tall; optional stack extender available			
Connections	Electrical: 460VAC, pneumatic: 85psi or greater
